THE ANSWERS

1. **100%** The probability that the first card drawn is a heart is $\frac{13}{52} = \frac{1}{4}$. The probability that the second card drawn is a heart is $\frac{12}{51} = \frac{4}{17}$. The probability that both cards drawn are hearts is $\frac{1}{4} \times \frac{4}{17} = \frac{1}{17}$. The probability that the first card drawn is a heart and the second card drawn is not a heart is $\frac{1}{4} \times \frac{39}{51} = \frac{13}{68}$. The probability that the first card drawn is not a heart and the second card drawn is a heart is $\frac{39}{52} \times \frac{13}{51} = \frac{13}{68}$. The probability that neither card drawn is a heart is $\frac{39}{52} \times \frac{38}{51} = \frac{19}{26}$.

THE ANSWERS

1. **100%** The probability that the first card drawn is a heart is $\frac{13}{52} = \frac{1}{4}$. The probability that the second card drawn is a heart is $\frac{12}{51} = \frac{4}{17}$. The probability that both cards drawn are hearts is $\frac{1}{4} \times \frac{4}{17} = \frac{1}{17}$. The probability that the first card drawn is a heart and the second card drawn is not a heart is $\frac{1}{4} \times \frac{39}{51} = \frac{13}{68}$. The probability that the first card drawn is not a heart and the second card drawn is a heart is $\frac{39}{52} \times \frac{13}{51} = \frac{13}{68}$. The probability that neither card drawn is a heart is $\frac{39}{52} \times \frac{38}{51} = \frac{19}{26}$.

2. **100%** The probability that the first card drawn is a heart is $\frac{13}{52} = \frac{1}{4}$. The probability that the second card drawn is a heart is $\frac{12}{51} = \frac{4}{17}$. The probability that both cards drawn are hearts is $\frac{1}{4} \times \frac{4}{17} = \frac{1}{17}$. The probability that the first card drawn is a heart and the second card drawn is not a heart is $\frac{1}{4} \times \frac{39}{51} = \frac{13}{68}$. The probability that the first card drawn is not a heart and the second card drawn is a heart is $\frac{39}{52} \times \frac{13}{51} = \frac{13}{68}$. The probability that neither card drawn is a heart is $\frac{39}{52} \times \frac{38}{51} = \frac{19}{26}$.

3. **100%** The probability that the first card drawn is a heart is $\frac{13}{52} = \frac{1}{4}$. The probability that the second card drawn is a heart is $\frac{12}{51} = \frac{4}{17}$. The probability that both cards drawn are hearts is $\frac{1}{4} \times \frac{4}{17} = \frac{1}{17}$. The probability that the first card drawn is a heart and the second card drawn is not a heart is $\frac{1}{4} \times \frac{39}{51} = \frac{13}{68}$. The probability that the first card drawn is not a heart and the second card drawn is a heart is $\frac{39}{52} \times \frac{13}{51} = \frac{13}{68}$. The probability that neither card drawn is a heart is $\frac{39}{52} \times \frac{38}{51} = \frac{19}{26}$.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for ensuring the integrity and transparency of the financial system. This section also outlines the various methods used to collect and analyze data, highlighting the role of technology in streamlining these processes.

The second part of the document focuses on the implementation of these systems across different departments. It details the challenges faced during the rollout and the strategies employed to overcome them. This section provides a comprehensive overview of the current state of the organization's financial operations and the progress made towards achieving its goals.

CONCLUSION

In conclusion, the implementation of the new financial system has been a significant milestone for the organization. It has enabled us to achieve greater efficiency, accuracy, and transparency in our financial reporting. We are confident that these improvements will continue to drive our success in the future.

APPENDIX A

This appendix provides a detailed overview of the data sources and methods used in the study. It includes a list of all data sources, a description of the data collection process, and a summary of the data analysis techniques used. This information is intended to provide transparency and ensure the reproducibility of the study's findings.

APPENDIX B

This appendix contains a list of all the data sources used in the study. It includes the name of the source, the type of data, and the date of collection. This information is provided to ensure the transparency and reproducibility of the study's findings.

The following table provides a summary of the data sources used in the study.
